BIOGRAPHY

Dr. Miguel Stanley has practised dentistry for almost thirty years. In 1999, a year after qualifying, he founded White Clinic in Lisbon and has built it into a forty-person multidisciplinary practice with its own digital laboratory, a training academy, and since 2026 a Precision Longevity Medicine department. Recognised as a Leading Dental Center of the World since 2010, it is among the first dental practices anywhere to integrate hyperbaric oxygen, cryotherapy and photobiomodulation into surgical care, and to establish a longevity medicine department within a dental clinic — bringing the mouth-body connection from principle into measured clinical practice. He still treats patients there every day.

His clinical work is complex full-mouth rehabilitation, implant surgery and the correction of failing legacy dental work, planned interdisciplinarily and executed under the Slow Dentistry principles he founded: never more than one patient an hour, never more than eight patients a chair a day. He introduced a succession of technologies to Portuguese dentistry — professional whitening in 2004, cone-beam CT in 2007, 3D-printed surgical guides in 2014, photobiomodulation in 2015, chairside salivary inflammation testing in 2024 — and moved the clinic's implantology decisively to ceramic.

Licensed to practise in Portugal, the United Kingdom and Dubai, he has delivered over 300 lectures, keynotes and webinars in 50 countries across five continents, in four languages, on implantology, prosthodontics, complex oral surgery, aesthetics, digital dentistry, practice management, ethics and the mouth-body connection. He has given two TEDx talks — London in 2017 and Lisbon in 2025 — and is the only dentist to have hosted a documentary on dentistry for National Geographic.

He holds an academic appointment as Adjunct Assistant Professor in the Department of Preventive and Restorative Sciences at the University of Pennsylvania School of Dental Medicine, and sits on the inaugural Clinical Innovation Board at the Harvard School of Dental Medicine at the invitation of its Dean.

Dr. Stanley is the founder of the Slow Dentistry Global Network, a non-profit with members in over 60 countries; founder of Missing Link, an AI platform screening for hidden oral inflammation; Vice President of the Digital Dentistry Society; and a consultant and key opinion leader to leading companies in the industry. Before any of that, he created and produced television programmes on dentistry for Portuguese broadcasters and served as Chief Dental Consultant to CBS's Emmy Award-winning *The Doctors* in Hollywood. He has been named one of the 32 Most Influential People in Dentistry by *Incisal Edge*.

His podcast is *Biting into Healthcare*.

EDUCATION AND TRAINING

Occlusion Guided Aesthetics Hornbrook Group, Chicago, 2005

Dental Aesthetics, postgraduate courses CEOSA, Madrid, 2001–02

Postgraduate Degree and Implant Training Brånemark Centre, CEOSA, Madrid, 2000–01

Implant Surgical Training with Dr. Dennis Tarnow, New York University College of Dentistry, Lisbon, 1999

Degree in Dental Medicine (DDS) Instituto Superior de Ciências da Saúde-Sul, Lisbon, 1998

Continuing Professional Development Over 100 verified CPD hours annually since 2000, accrued through both the delivery and the attendance of lectures, congresses and webinars internationally.

Licences Portugal (OMD) • United Kingdom (GDC) • Dubai

ACADEMIC APPOINTMENTS

Adjunct Assistant Professor , Department of Preventive and Restorative Sciences, Associated Faculty, University of Pennsylvania School of Dental Medicine — since July 2020

Member, Inaugural Clinical Innovation Board , Harvard School of Dental Medicine — appointed January 2025 by invitation of Dean William Giannobile

PROFESSIONAL POSITIONS

Founder and Clinical Director , White Clinic, Lisbon — 1999–present

Founder , Slow Dentistry Global Network — 2015–present

Founder , Missing Link AI — 2023–present

Founder , White Clinic Training Academy

Vice President and Board Member , Digital Dentistry Society

AWARDS AND RECOGNITION

Named one of the **32 Most Influential People in Dentistry** — *Incisal Edge*, USA

Top Award for Management Dental Pro, 2025

White Clinic Leading Dental Center of the World, since 2010

Nominated among the **top 100 dentists worldwide** by peers, 2020

CLINICAL PRACTICE — WHITE CLINIC

Founded 1999, Lisbon. Founder, owner and Clinical Director for 27 years.

Scale Around forty clinicians and staff. Seven surgical and treatment units, deliberately staffed with more chairside assistants than chairs. Dedicated in-house digital laboratory with 3D printing for same-day restorations. Monday to Friday only.

Scope A full-scope family practice — routine, paediatric and general dentistry — alongside advanced interdisciplinary care: complex full-mouth rehabilitation, implant surgery, revision of failing legacy dental work, cosmetic dentistry, orthodontics, sleep and airway therapy, sports dentistry and paediatric facial growth.

Departments Dental Medicine · Integrative Oral Medicine with high-precision diagnostic testing · Precision Longevity Medicine (launched March 2026, with laboratory partnerships including Nordic Labs and Germano de Sousa, and imaging through Hospital da Luz) · Technology and Regenerative Therapies · White Clinic Training Academy.

Technology Cone-beam CT, intraoral and facial scanning, AI-assisted radiographic analysis, in-house CAD/CAM and 3D printing, guided surgery, Er:YAG and diode lasers, photobiomodulation, hyperbaric oxygen, cryotherapy, PRF, ozone and IV therapy, chairside vitamin D and salivary aMMP-8 testing.

Operating philosophy Every patient is treated under the Slow Dentistry protocol the clinic originated: one patient per hour, a maximum of eight per unit per day, full disinfection between every appointment. Every first appointment includes a complete diagnostic workup before any treatment is proposed. Post-surgical healing is actively managed, not left to chance.

Recognition Leading Dental Center of the World since 2010. Approximately 10 million people reached annually across the clinic's and Dr. Stanley's channels.

Daily clinical work Complex full-mouth rehabilitation, implant surgery, revision of ageing and failing dental work, aesthetic reconstruction. Personally places well over a hundred implants a year, predominantly ceramic.

Approach Biology-first surgical protocol. Interdisciplinary planning of every complex case — restorative dentist, periodontist and orthodontist together, before treatment begins — with a core clinical team that has worked together for two decades. CleanImplant-certified implant surfaces. Rubber-dam isolation for all restorative work. BPA-free composites. Guided surgery since 2014.

Clinical firsts in Portugal

- Professional in-office whitening — introduced 2004; longest track record in the country
- Cone-beam CT in private dental practice — since 2007
- 3D-printed surgical guides — since 2014

- Photobiomodulation — introduced to the Portuguese market 2015, with multiple subsequent publications
- Hyperbaric oxygen for post-surgical healing — approximately eight years
- Chairside salivary aMMP-8 inflammation testing — introduced the concept to Portugal, 2024
- Point-of-care vitamin D testing — over a decade
- Nitrous oxide sedation for children — 26 years

Sleep and airway Combined protocol of vertical-dimension correction, laser soft-tissue treatment, HIFES stimulation and 3D-printed nylon mandibular repositioning devices, delivered after medical diagnosis by sleep study.

CONCEPTS AND CLINICAL PHILOSOPHY

No Half Smiles® comprehensive treatment philosophy: full diagnosis and full planning before any treatment. Registered 2008.

Slow Dentistry a clinical and operational standard: one patient per hour, a maximum of eight per unit per day, uncompromised disinfection between appointments. Founded as a global network in 2015; members in over 60 countries.

T9 a nine-step clinical sequence — Teach, Test, Target, Think, Talk, Treat, Track, Transform, Thrive — in which treatment is the sixth step, not the first. Originated 2025.

TELEVISION AND MEDIA

"The New Boundaries of Dentistry" National Geographic. Host. Filmed in Korea, Uganda and Portugal; the first documentary on dentistry produced for the network

"The Doctors" CBS, Hollywood. Chief Dental Consultant to the Emmy Award-winning programme, 2011–12

"Os Doutores" SIC, Portugal. Chief Dental Consultant to the Portuguese edition, 2011–12

"Dr. White" SIC, Portugal. Creator and Executive Producer, 2010–12

"Doutor Preciso de Ajuda" TVI, Portugal. Executive Producer and lead dentist, 2005–08

Biting into Healthcare host, podcast and YouTube channel

Linha Dentária created the first Portuguese dental blog, for SAPO, 2001

Member , General Dental Council (GDC), United Kingdom

CONGRESSES ORGANISED

12th SENAME International Congress — "The Future of Dentistry" Lisbon, 2015. Hosted by Dr. Miguel Stanley, with 23 internationally recognised keynote speakers. SENAME, founded 1999, is represented in 17 countries and invites the world's leading clinicians and scientists to its annual congress.

CHARITABLE AND SOCIAL CONTRIBUTIONS

Mundo a Sorrir White Clinic provides free dental care, including orthodontics, to underprivileged children. In December 2016 Dr. Stanley performed a concert of twelve original tracks to an audience of over 300, with all proceeds donated to Mundo a Sorrir and The Humble Smile Foundation.

The Humble Smile Foundation Global Ambassador since 2016. The foundation provides dental care to children in need and produces biodegradable bamboo toothbrushes.

END IOM, Global Child Dental Fund invited by Prof. Raman Bedi (King's College London, former Chief Dental Officer of the United Kingdom) to help lead the campaign against Infant Oral Mutilation.

Dental Education Program Founder, 2003–05. A free oral-health education programme for children in schools.

LANGUAGES

Portuguese · English · Spanish · French — lectures delivered in all four.
